

INTRODUCTION

I'm a Senior at the Rhode Island School of Design majoring in Industrial Design with a concentration in Sustainability. I have always been interested in the environment, with a focus on design and aesthetics. Over the past seven years, I've honed my graphic and industrial design skills working with nonprofits, graphic and industrial design firms, and most recently at a beekeeping company. I am seeking postgrad opportunities to learn and grow in new and exciting environments.

EDUCATION

Rhode Island School of Design, Providence, RI - Expected Graduation 2019

WORK EXPERIENCE

The Best Bees Company

Boston, MA

Best Bees is a beekeeping services company that delivers, installs, and manages beehives for residences and businesses throughout New England and major cities across the US.

Design Intern

2018

As the company's first design intern I assisted creative director Paige Mulhern in elevating the brand and refining print materials while defining a style guide for companywide use.

Public Workshop

Philadelphia, PA

An organization creating opportunities for youth to shape the design of their cities.

Designer and Builder

2012-2017

Collaborated with teams of youth designers and builders to participate in community design projects in Philadelphia involving design, fabrication, electronics, and art.

Tiny WPA

Philadelphia, PA

A nonprofit organization that provides training in design, collaboration, leadership, fabrication, and entrepreneurship.

Graphic Designer

2016

Assisted in designing and laying out signage and grant applications, engaged neighbors and community members in multigenerational design-build activities, and supervised youth and adults in the use of power tools and vinyl cutter in Tiny WPA's collaborative workshop located in West Philadelphia.

PlusUs

Philadelphia, PA

An educational design consultancy in Philadelphia.

Student Intern

2012-2015

Created curricula, publications, and other designed print materials using Adobe Illustrator, Photoshop, and InDesign. Collaborated to create a short course for middle-school science students that encouraged them to investigate water quality in their community.

SKILLS

Proficient in Adobe Creative Suite, iLife, iWork, Google Apps, and Microsoft Office with experience woodworking, metalworking, laser and vinyl cutting, model making and rapid prototyping. Excellent communication skills, friendly, outgoing personality, well suited for fast paced environments, ability to multi-task, proven organization skills.

EXTRACURRICULARS

President, RISD Beekeeping Club

Member, RISD Cycling Team
